

2 false breaks: of a triangle & a wedge

Well, the market has kept its promise and did not let the buyers of the 15th of June go. Over the week-end we saw a beautiful rising wedge built up, with the break of which many of you have triggered their short positions, the others - have added up on to their shorts. The new low below 17560 will result in soonest reaching of the 3rd target of yours @ 12500. All in all, good work of "smart money".
