We have prepared a sweet idea for you in the middle of the week. Look at this nice “sweet zone” trap for ETH! The only possible thing left is whether we’ll be able to see here a special but not necessary “trap within a trap”? However, the sell-stop orders of yours are worth placing now indeed. All the buyers above 3420 are surely “playing with fire” and will be soon losing money. We can expect the spin high @3700 or so with fixing of your profits on 1-4-6 bearish Wolfe pattern target line. A 1000-dollar downside potential – think of it this Wednesday!
