

Stella has permitted the price a cautious break of a 20-cent level

After that break there have been already: the 1st wave impetus and retrace with a double test of 0.1660. The price is currently slightly higher, with a sign of buying from the counter-trend. There is a buy-stop trigger @0.2050 with a stop of 0.1660 & targets @0.2740, 0.42 & higher if the price fills the 1st target @0.2740. The coin is to be on your watch list definitely.
