

The tactical target is confirmed – 30000

The latest shallow retrace to 50% coupled with the relevant bull trap on top have given us the confirmation of the nearest goal of 30K (small ovals in blue & big ovals in black). The lower border of the broadening wedge needs touching by the price before we will be able to see the continuation way. One can safely say that once 30K is hit then the large futures wallets will have a close look at 20K and by far lower.
