

### Three opened stop-orders are working out

By the end of the week we are in the doorway of a good price move across the lower border of a triangle. If you have followed recommendations, you will not need to add up to your position until your PTs are (profit targets) executed. It would be correct to place them @24.5K, 20K & 12.5K. Thus we dare to make an assumption that another portion of bulls is trapped, and it is one more time to enjoy the soonest plentiful profit crop of yours and smile.
