Waves has waved a "Dead Cat Bounce"

A very interesting price move we are currently experiencing on Waves. In fact, out of TOP 100 this coin has obviously managed to come to the stage of "DCB" (dead cat bounce) as the 1st one! The absolutely critical for DCB are: a small time-frame (one hour here) and a long weakness formation (the rising wedge here). As you can see with the current target highs @12 we are then likely to see the price @3, 2 and even 1 dollar. Enjoy watching DCB which you can bump into on quite a rare basis.
